info@centrelearoback.ca
ou www.centrelearoback.ca

Open to all – free
Bring your lunch! On-site cafeteria.

Participants will receive
professional development credits.

Through the evaluation of Healthy Cities for the European WHO office, Evelyne de Leeuw developed a "realistic synthesis" methodology. This method focuses on results that are expressed in terms of governance, partnerships, intersectoral action, participation, empowerment, and equity. Ms de Leeuw will offer a critical analysis of this method, from its roll-out to the surprising results it has brought to light.

« Pensez à votre santé. Rien de ce qui s'est produit dans votre vie qui est important ne fait défaut de s'inscrire dans votre trajectoire. »

Paul Bernard
